- **Project Team Collaboration Tools**
- **Gantt Charts**

#### BETTER DECISION MAKING

A portfolio management tool makes it easier to anticipate outcomes by giving you insight into past project metrics. It also helps filter out projects that aren't contributing to an organisation's corporate objectives by analysing their performance.

#### FASTER PROJECT TURNAROUND

By streamlining workflows, these tools automate repeatable processes involved in completing a project portfolio. They keep work cycles well-oiled and increase productivity as they answer the most basic question – what to do next? These tools don't let businesses lose focus on strategically aligned projects that give better business results.

#### BOOSTS COLLABORATION

Project portfolio management tools boost smart decision-making by bringing in project transparency. They offer real-time access to data and insights required to complete a project. They also centralize data for easy access and improved real-time collaboration within teams.

#### REDUCES OVERSPENDING

Various factors can cause overspending like poor project estimates, faulty resource allocation, improper scheduling, and zero visibility into project data. Users of these solutions have reported decreased overspending as they provide accurate project estimates and efficiently allocate resources.

#### ENHANCE PROJECT DELIVERY SUCCESS

PPM tools offer capabilities to plan projects based on their resources, strategic alignment, accurately estimate costs and increase the chances of successful project execution.

# PROJECT PORTFOLIO MANAGEMENT

Statistics reveal that 89% of the most efficient organizations use PPM tools to manage their daily activities. Your tool lets you optimize tasks, resources, budgets and projects to create a high-yield portfolio.

## HOW WE WORK?

### ABOUT ASPIRA

Aspira is now part of the emagine Group and with over 15 years of experience, is a dynamic, fast-growing international consulting and technology company, founded on real-world experience, and focused on custom-fit solutions. We have the people and proven expertise to complete complex projects while delivering lasting knowledge transfer benefits to empower our clients for the next challenge. Working across sectors both public and private, from utilities and energy to banking and pharma, our key focus is to give the authentic guidance companies need to realise their potential. From Advisory And Project Management Training To Resourcing, Business Applications, Software Development, And IT Services. We Take Ownership. We Lead.

### PROJECT KICK START

To ensure a smooth kick-off we will bring the project team together to set expectations, review project goals, explore risks, issues, and assumptions, and confirm timelines.

### ENVISIONING & DEPLOYMENT

Envisioning workshops are held to confirm goals and focus areas. Each focus area will include configuration, reviews, and approval cycles. We will create a review approval document for sign-off.

### FINAL REVIEW

End-to-end validation to confirm the solution has been configured properly by meeting project requirements. We will compile approval documents and get the final UAT approval sign-off.

### TRAINING & WORKSHOPS

User adoption is a vital piece of a successful implementation. Our expert trainers will teach you the necessary tools for you to walk away feeling confident and able to use the tool effectively.

### PRODUCTION DEPLOYMENT

Once we have the final approval sign-off we will complete the implementation and take the solution live. Once live we will ensure the project goals have been met and you are satisfied with the results.

### SUPPORT

After go-live, we will be there to answer any questions or work on any issues should they arise. We will provide Q&A, best practices, and mentoring sessions from our expert in-house PPM Team.
